TV Broadcast & Command Centers

The Sun Never Sets On A Northern Air System

Since 1998, Northern Air Systems has been a leading provider of specialized cooling systems worldwide.

Northern Air Systems Overview

Since 1998, Northern Air Systems has been a leading provider of specialized cooling systems worldwide. With thousands of systems in operation today, we have the lowest downtime of any cooling system on the market. Northern Air Systems has developed an integrated cooling system for many different industries, and has been the trusted name for quality and dependability.

You never know what type of environment conditions you will run into when you take your mobile unit out on the road. All you really know is that you have a job to do, and you have to do it now. You depend on your mobile unit to work 100% of the time. Down time due to component failure is not an option. That's why companies all over the world choose Northern Air Systems for their TVBC cooling solutions!

SMART DESIGN

- Efficient energy saving operation can cut power consumption by as much as 70%
- Ambient temperatures to 55° C
- Unsurpassed reliability with two independent systems
- Designed and built for over the road applications
- Modulating cooling using digital scroll technology to match load condition
- Exceptional optional redundancy and multi-staging
- EC fan technology provides lower current draw with better performance
- Adjustable evaporator fan speed to control air flow to exact customer requirement
- 50/60 hertz operation
- Lightweight aluminum construction

USER INTERFACE

- Microprocessor controlled system continually monitors operations
- User interface displays set points, temperature and full alarms
- Self-diagnostic system helps with troubleshooting
- Monitored system runtime to help ensure proper service intervals

ACCESSIBILITY

- All components accessible through latched service doors
- Electrical compartments are neatly organized and touch-safe
- Fuse free convenience for quick troubleshooting

OPTIONS

- Coated coils
- Stainless steel finish or custom powdercoating
- Lead lag operation
- Worldwide remote monitoring via cellular
- Customized programming
- Custom filtration packages
- Continuous compressor operation
